linkedin.com/in/pranavkumar-desai | pranavkd.in | Pune, Maharashtra

Summary

Computer Science graduate (B.Tech, June 2026) with professional GenAI, full-stack, and systems programming experience. Passionate about building production-grade AI applications with LLMs, RAG, and agentic workflows across web, edge, and cloud infrastructure.

Experience

Accenture

Software Engineer

Pune, India

May 2026 – Present

- Develop and ship enterprise backend services with **Java** and **Spring Boot**, designing scalable **RESTful APIs** and microservices
- Own API contract and schema design across **Agile** teams for consistent system communication

Astuto.ai

Full Stack Engineer Intern

HSR Bangalore

Mar 2026 – May 2026

- Architected backend APIs with **FastAPI** on **AWS** and built responsive **Next.js** frontend features
- Automated cloud cost-optimization ticket routing by integrating **ServiceNow** with Onlens, replacing manual assignment to engineering teams

Vulncon

Frontend Developer Intern

Remote

Jan 2025 – Jul 2025

- Spearheaded migration from legacy CSS to **Tailwind CSS**, reducing stylesheet size by 40%; **built** pixel-perfect interfaces from **Figma** designs

Projects

Basalt – Offline-First Markdown Knowledge Base

Code

- Engineered a desktop Markdown knowledge base with **Tauri (Rust + React)**, achieving sub-16ms rendering and sub-150ms full-text search across 5,000+ notes with **Tantivy + Nucleo**
- Designed an interactive graph for real-time exploration of relationships across 5,000+ notes

Cropia – AI-Powered Crop Health Detection

Demo | Code

- Built a GenAI-powered agricultural platform using **Google Gemini 2.5 Flash Lite** for offline-first disease detection; **Astro** landing page scored 100/100 PageSpeed
- Built a government analytics dashboard with interactive geospatial maps and an AI-powered Regional Analysis Agent for real-time outbreak alerts

Rahi – Antique Jewellery E-Commerce

Demo | Code

- Engineered a full-featured e-commerce platform with 3 role-based dashboards using **Next.js 16 + Hono**, backed by **Drizzle ORM** and **PostgreSQL**
- Built product management, order tracking, and secure auth (**Better Auth**) with **Cloudinary** image management

Skills

Languages : Python, TypeScript, Java, Rust, C

Frontend : React 19, Next.js 16, Astro, Tailwind CSS, Shadcn/UI, TanStack Query, Zustand

Backend : Hono, FastAPI, Spring Boot, REST APIs, Microservices, Drizzle ORM, Prisma, Zod

Cloud & DevOps : AWS (EC2, S3, Lambda), Cloudflare Workers, Docker, CI/CD, Turborepo, Vercel

GenAI : LLMs, RAG, LangChain, Prompt Engineering, Vector Databases, Google Gemini

Databases : PostgreSQL, MongoDB, Cloudflare D1

Tools : Git, Linux, Tauri, Figma

Education

Lovely Professional University

B.Tech in Computer Science

Phagwara, Punjab

June 2026

- CGPA**: 8+/10 | **Coursework**: Data Structures & Algorithms, Machine Learning, LLMs & LangChain, RAG Systems, Database Systems, Computer Networks

Brilliant School of Science & Engineering

XII – Science

Karad, Maharashtra

June 2021
